Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: http://www.uspto.gov/main/howtofees.htm.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or obviously suggest the claimed invention.

- 2. Specifically, no teaching or obvious suggestion was found of the limitation " controlling the irradiation of the plurality of charged particle beams, based on proximity effect correction data for correcting the plurality of charged particle beams for each incidence position with respect to the object to be exposed, in order to reduce the influence of a proximity effect, and calibration data for correcting variations in the irradiation dose among the plurality of the charged particle beams" as in claim 16 and 19.
- 3. In addition, no teaching or obvious suggestion was found of the claimed invention wherein a charged particle beam exposure which draws a pattern on an object to be exposed by a plurality of charged particle beams emitted from a plurality of element electron optical systems and storing "calibration data for correcting variations in the irradiation dose among the plurality of the charged particle beams emitted from the plurality of element electron optical systems" as in claim 1.
- 4. Similarly, no teaching or obvious suggestion was found of the limitations: "determining optimum proximity effect correction data for controlling standard dose data in accordance with a judgment as to whether a selected piece of proximity " and "determining the calibration data of each of the element electron optical systems, based on the irradiation dose measured in said measuring step" as in claim 7.

Application/Control Number: 09/708,590

Art Unit: 2881

5. Namely, US Pat No 6,107,636 issued to Muraki discloses an exposure apparatus for drawing a pattern on an object to be exposed by a plurality of charged particle beams which are divided from a charged particle beam emitted from a charged particle source (col.7, lines 35-40).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
